

Hinterrhein Firing Range

The Hinterrhein Tank Firing Range is a training ground, but S+T can use it during certain time slots in the course of the year. The firing range is particularly used for tank firings and blasting tests with large quantities of explosives. During all test activities environmental requirements are strictly adhered to.

Hinterrhein Tank Firing Range

Facilities for high-angle fire and direct fire

armasuisse-owned blasting site for large quantities of explosives

Technical data

- Alpine mountain landscape at an altitude of 1640 a.s.l., valley floor surrounded by steeply rising flanks
- Generously designed tank firing range with many tracks and firing platforms;
- Blasting site for tests with large quantities of explosives
- armasuisse-owned measuring and evaluation bunker next to blasting site
- Avalanche gallery for vehicle parking
- Evaluation building

Characteristics / description

In the first instance the Hinterrhein Firing Range is used for gunnery training by the armoured corps. In addition to special courses organised by the Combat Training Center Walenstadt, armasuisse also uses the firing range.
