Remarks:

1) The banking register contains all current banking agreements with armasuisse that allow for publication. A banking agreement can be concluded with foreign suppliers if a future offset obligation is likely. It allows foreign suppliers to pre-fulfil up to 20% of a future offset obligation through offset transactions in Switzerland. Each offset transaction must generally be transferred to an offset obligation within 5 years of the respective order date or the corresponding credit expires. Details of individual offset transactions are subject to commercial confidentiality and may not be published.

2) The credit balance is measured in the currency as per the banking agreement; where not in CHF, the exchange rate on the reporting date of the banking register was used.

3) The consent of Swiss beneficiaries to publication in the banking register is given in the Offset Declaration Form (ODF) since 1 April 2018. Swiss beneficiaries in prior offset transactions may not be published.
